Franchise Tax Board

Cal/Expo

Dept of Water Resources

California Dept of Child Support Services

Bureau of Automotive Repair

Dept of Consumer Affairs

California Conservation Corps

University of California, Davis

Dept of Transportation (Cal/Trans)

Dept of Justice (Attorney General)

California Dept of Parks and Recreation

ev Sacramento is a state-sponsored incentive program that helps public fleets in Sacramento lease electric vehicles at competitive prices. By offsetting higher costs of these vehicles, the program dramatically increases the use of zero-emission electric vehicles in the area's public fleets. The program also provides excellent public image opportunities for state and local agencies to demonstrate their support for innovative clean air initiatives.

Founded in 1999, **ev Sacramento** is sponsored through a partnership between the California Air Resources Board and the Department of General Services.

Since January of 2000, **ev Sacramento** has:

- Placed nearly 100 electric vehicles in Sacramento's government fleets — the largest deployment ever undertaken by a California city;
- Provided these fleets with thousands of miles of lower operating, fueling and maintenance costs, high reliability, employee satisfaction, zero pollution and a positive environmental image;
- Increased the area's electric vehicle charging capacity by 25%! — 70 chargers have been installed in over 30 new locations throughout the Sacramento area;
- Dramatically increased public awareness about the operation and benefits of zero emission vehicle technology; and
- Advanced Sacramento as an electric vehicle center
